And be sure to.Q: Why `into_string` in Rust are called `as_str` Why Rust strings are always called as_str and are never called as_str_raw as in other languages? Rust book only shows an example how to call as_str. A: As of the time of writing this, Rust's documentation still refers to strings as as_str, even for values that are generally considered strings in other languages. The documentation on strings, however, refers to strings in other languages as raw strings. For example: In languages with a builtin string type, in particular C, C++, Java, and C
